8.0			520	260	520	260	8.0
8.33			490	245	490	245	8.33
9.0					420	210	9.0
10.0					330	165	10.0
10.72					280	140	10.72

The above table is in compliance with British Standards for a machine on flat firm ground.

Wylie w2245 SLI fitted and calibrated in accordance with above figures.

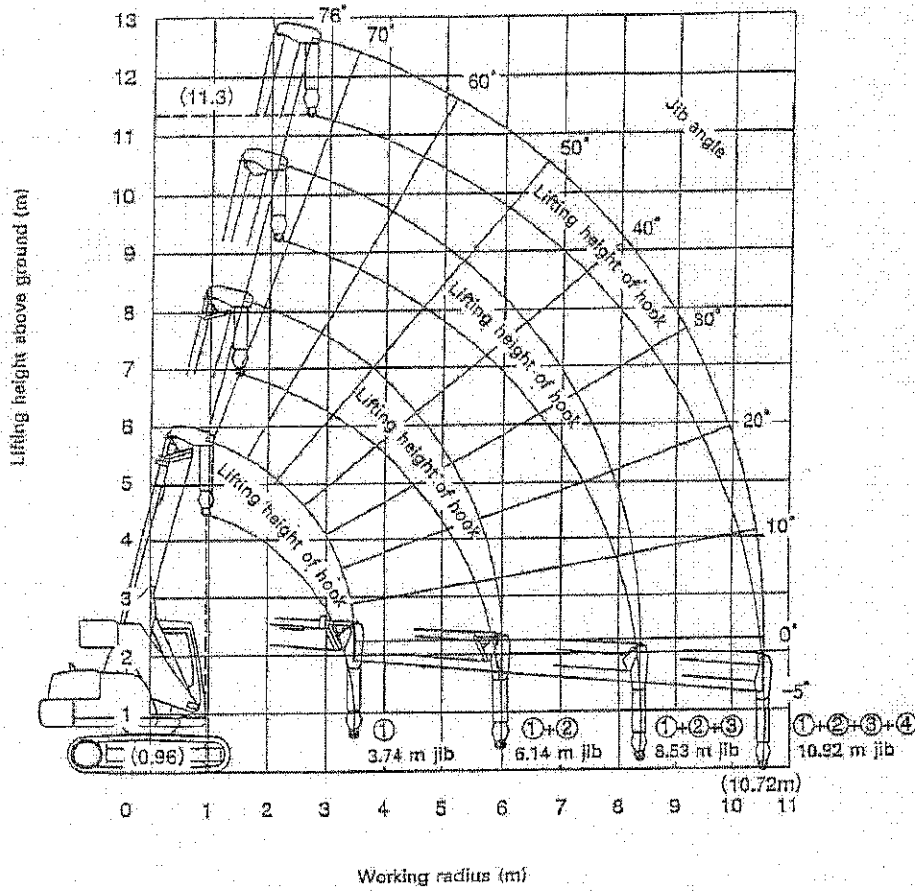

When on 2 fall duty 2 - 3 Metre radius on static duties, maximum lift is 2500 Kgs.

At radii greater than 3 Metres, duties are as 4 fall.

Weight of hook block = 80 Kgs.

Deductions from the lift crane capacities must be made for the hook block & slings etc.

**KOMATSU LC605**

The above graph shows the condition when there is no load, and does not include any deflection of the jib.
